All prices & time are subject to change
Terms and conditions apply

As part of the service we inspect the air, pollen and secondary filters to assess whether or not they need to be changed, these can then be changed at the owners discretion.

*On our 60M service an additional 500ml of brake fluid will be used as the brake hoses are replaced on this service.

60* Nissan recommend, for safety, having the brake lines changed at the 60,000 mile / 5 year service. We routinely check the brake lines and advise if they are in need of replacement. If not, we would suggest moving their replacement to the next service (6M) to spread the extra cost.

Each service includes a detailed multipoint check sheet designed specifically to suit known issues with the GTR.

Popular Service Options (Prices ex. VAT)		
Filters
